

Subject 1647  
March 20, 2015

**TO:** Subscribers to UL's Certification Services Under the Standard for Motor-Operated Massage And Exercise Machines, UL1647

**SUBJECT:** Industry File Review – Effective Date Extension

UL's letter of May 6, 2011, announced changes in requirements in the Standard for Motor-Operated Massage And Exercise Machines, UL 1647, Fifth Edition, as follows:

Paragraph/Table	General Subject and Comment
Section 77	<ul style="list-style-type: none"><li>Treadmills shall comply with <b>new conducted emission requirements</b>. Treadmills are to comply with the applicable requirements in CISPR 14-1, Electromagnetic compatibility - Requirements for household appliances, electric tools and similar apparatus - Part 1: Emission.</li></ul>

UL has received information from industry sources that this change require improving control board and motor designs (not previously realized until these changes were started), have proven to require more time to work through, resolve, and implement. UL has been asked to extend the Effective Date. After consideration of these requests, UL agrees to an extension of the Effective Date to **April 21, 2017** for Treadmills to provide sufficient time for UL to complete the tests and update documents.

It is anticipated that all testing and resulting revisions will be completed no later than March 21, 2017 provided that all documentation and required samples necessary to determine compliance are received at UL no later than January 21, 2017.

Revisions to UL Follow-Up Procedures, including deletion of models and specific constructions on the previous Effective Date, resulting from Applicant requests or prior investigation of products by UL will remain in place unless an Applicant specifically requests that UL reverse such revisions. Applicants interested in retaining such models or constructions until the new Effective Date should contact UL's Customer Service Department immediately.

Should you have questions regarding this extension, please contact Michelle Andersen by email (Michelle.Andersen@ul.com).

Sincerely,

Ivan Choi  
Engineering Manager,  
Small Appliances
