

June 16, 2016

TO: Subscribers to UL's Canadian Certification Service
CSA C22.2 No. 270-14 Arc Fault Protective Devices.

SUBJECT: Industry File Review for CSA C22.2 No. 270-14 Effective Date Extension

As announced in UL's Action Required Letter of April 25, 2016, CSA has issued a new standard CSA C22.2 No. 270-14 Arc Fault Protective Devices with the effective date of June 30, 2016.

Based on comments received from industry and CSA activities to issue an amendment to align CSA 270-14 with UL 1699, in order to minimize the impact of the file review this bulletin announces the extension of the Effective Date for the subject Industry File Review from June 30, 2016 to March 30, 2017. (9 month extension)

It is anticipated that all testing and resulting revisions will be completed no later than March 30, 2017, provided that all Industry File Review projects are opened no later than January 30, 2017, and all requested samples are received at UL no later than February 30, 2017.

Should you have questions regarding this extension, please contact me by e-mail.

Sincerely,

Frederick Reyes
