INDUSTRY FILE REVIEW – EFFECTIVE DATE EXTENSION ANNOUNCEMENT

TO: Subscribers to UL's Certification Services under the Fire Pump Controllers, UL218

SUBJECT: Industry File Review – Effective Date Extension Announcement

This Bulletin is to advise subscribers of an effective date extension announcement for the ongoing Industry File Reviews (IFR) under Fire Pump Controllers, UL218, 3rd Edition, Issue Date September 16th, 2015.

UL proposed in a bulletin dated December 21st, 2018 to extend the effective date for Industry File Review (IFR) under the subject standard to September 1st 2019. During the comment period, UL received no negative responses and in view of this, the effective date is being extended to September 1st 2019. As stated in the aforementioned bulletin, the effective date extension is due to obtaining the necessary EMC (Clause 7.17) test data either witnessed by or tested at a UL lab.

Revisions to UL Follow-Up Procedures, including deletion of models and specific constructions on the previous Effective Date, resulting from Applicant requests or prior investigation of products by UL will remain in place unless an Applicant specifically requests that UL reverse such revisions. Applicants interested in retaining such models or constructions until the new Effective Date should contact UL's Customer Service Department immediately

Should you have any questions about this bulletin please contact Brian Spera at 631-546-2529 or Brian.M.Spera@ul.com.

Sincerely,
Brian M. Spera
Engineering Leader
