

Subject 827

July 12, 2017

TO: Subscribers to UL's Certification Services under the Standard for Central Station Services, UL 827

SUBJECT: **Industry File Review – Effective Date Extension Announcement**

This Bulletin is to advise subscribers of an effective date extension announcement for the ongoing Industry File Reviews (IFR) under UL 827, Standard for Central-Station Services, 8th edition dated October 29, 2014.

UL proposed in a bulletin dated June 9, 2017 several options to extend the effective date for Industry File Review (IFR) under the subject standard to July 31, 2018. During the comment period, UL received no negative responses against extending the effective date, and all of the responses recommended selecting Option 1. In view of this conclusion, the effective date is being extended to July 31, 2018. Option 1 was to extend the effective date for all applicable revisions to UL 827.

All revisions made to your Central Station certificated services to meet the new and revised requirements of UL 827, will remain in place unless an Applicant specifically requests that UL reverse such revisions. Applicants interested in retaining previous certification levels until the new Effective Date should contact UL's Customer Service Department immediately.

Please direct any questions you may have to Dan Kaiser (daniel.j.kaiser@ul.com).

Very truly yours,

A handwritten signature in blue ink that reads "Daniel J. Kaiser".
