**INDUSTRY FILE REVIEW – EFFECTIVE DATE EXTENSION PROPOSAL**

TO: Subscribers to UL's Certification Services under Fire Pump Controllers, UL218

SUBJECT: Industry File Review – Effective Date Extension Proposal for EMC Clause 7.17 Test Data

This Bulletin is to advise subscribers of an effective date extension proposal for the ongoing Industry File Review (IFR) under Fire Pump Controllers, UL218, 3rd Edition, Issue Date September 16th, 2015.

UL has received several requests from industry for an extension in obtaining the necessary EMC (Clause 7.17) test data either witnessed by or tested at a UL lab, which has not been provided as expected.

Therefore, UL is proposing a new Effective Date of September 1<sup>st</sup>, 2019 in order to accommodate industry in obtaining the necessary EMC test data and to allow time for review and update of associated files. We have established a 4 week comment period to receive subscriber feedback ending on January 18, 2019.

Please provide your decision in acceptance of the proposal directly to Brian Spera at 631-546-2529 ([Brian.M.Spera@ul.com](mailto:Brian.M.Spera@ul.com)) or John Kovacik at 847-664-2972 ([John.R.Kovacik@ul.com](mailto:John.R.Kovacik@ul.com)).

Sincerely
