**INDUSTRY FILE REVIEW – EFFECTIVE DATE EXTENSION ANNOUNCEMENT**

**TO: Subscribers to UL’s Certification Services under the Standard for Flexible Sprinkler Hose with Fittings for Fire Protection Service, UL 2443.**

**SUBJECT: Industry File Review – Effective Date Extension Announcement**

This Bulletin is to advise subscribers of an effective date extension announcement for the ongoing Industry File Reviews (IFR) under UL 2443, Standard for Flexible Sprinkler Hose with Fittings for Fire Protection Service, Edition 3, revised November 23, 2016.

UL proposed in a bulletin dated July 10, 2017 to extend the effective date for Industry File Review (IFR) under the subject standard to August 7, 2018. During the comment period, UL received no negative responses and in view of this, the effective date is being extended to August 7, 2018. As stated in the aforementioned bulletin, the effective date extension is due to additional revisions to the standard and the related significant impact on the level of testing as well as the samples required for testing.

Revisions to UL Follow-Up Procedures, including deletion of models and specific constructions on the previous Effective Date, resulting from Applicant requests or prior investigation of products by UL will remain in place unless an Applicant specifically requests that UL reverse such revisions. Applicants interested in retaining such models or constructions until the new Effective Date should contact UL’s Customer Service Department immediately

Should you have any questions about this bulletin please contact Daniel Weaver at [Daniel.R.Weaver@ul.com](mailto:Daniel.R.Weaver@ul.com) or +1 847 664 1462.

Sincerely,

Daniel R. Weaver
